EURODISC AS EUF OFFICIAL DISC SUPPLIER FOR 2018-2019

Dear EUF Members

The EUF is pleased to announce Eurodisc as the official disc partner for the 2018-2019 seasons!

After the successful evaluation in 2017 of the WFDF-approved competition disc *Eurodisc 175g 4.0 Organic* and the smooth introduction in all EUF youth competitions, EUF has decided to extend its usage to all EUF sanctioned events.

The Eurodisc 175g 4.0 Organic will be the official disc for all EUF tournaments and Camps.

This does not mean that games **MUST** be played with *Eurodisc 175g 4.0 Organic*.

At all EUF sanctioned tournaments there will be a sufficient number of Eurodisc game discs at every field. They can be used in warmup before the games.

The game disc regulation is the following:

- If both teams don't want to play with *Eurodisc 175g 4.0 Organic* they are allowed to play with a different disc.
- If one team wants to play with *Eurodisc 175g 4.0 Organic* and the other team doesn't, in **adult events** the another disc will be used.
- If one team wants to play with *Eurodisc 175g 4.0 Organic* and the other team doesn't, in **junior events** the Eurodisc game disc will be used.

This agreement is in-line with the decision made at the EUF General Assembly 2017 in Veenendaal, ratified by all EUF member federations.

EUF president Andrea Furlan says:

"EUF is very happy to continue the strategic partnership with Eurodisc started in 2016. Eurodisc demonstrated to be a reliable supplier of professional competition discs, with high quality, fast reaction time, competitive prices and no import taxes. All this facilitates the development of Ultimate in Europe, one of the core goals of the European Ultimate Federation."

"First of all, I would like to thank you for trusting in Eurodisc 175g 4.0 Organic ultimate disc for championship ultimate play all over Europe.", says Thomas Napieralski, owner of New Games – Frisbeesport, the company producing Eurodisc. *"The brand Eurodisc 175g 4.0 Organic intends to emphasize the special affiliation to the European nations. It's made to give Europe the possibility to be independent from using a monopolistic disc from overseas. However, Eurodisc 175g 4.0 Organic is not just another ultimate disc on the ultimate market. Its new and unique characters support all players to exercise their favorite sport with an environmentally friendly sport product. Eurodisc 175g 4.0 Organic is made of 100% renewable resources, which helps to reduce CO2 emissions that are responsible for the greenhouse effect"*
